- **Improve the issue of parts from stores to tradespeople**
- **Track the movement and location of parts quickly and easily**
- **Control inventory and reduce shrinkage rates**
- **Reduce steps for processing transactions and improve productivity**

For all your mobile asset management needs, PopWare's Mobile Inventory Management provides a mobile solution integrated with your MAXIMO application. Mobile Inventory Management delivers out of the box functionality with a set of robust applications operating on a wide variety of standard handheld devices.

The application provides unparalleled ease of use, with a familiar Windows based graphical user interface for improved flexibility and integration capabilities. Your casual and power users can quickly increase their productivity by enabling and enhancing their inventory management capabilities.

With PopWare's Mobile Inventory Management, your users can easily access critical information and perform transactions with improved speed and accuracy.

**Inventory Issues** - issue individual items or multiple items from reservations.

**Inventory Receipts** - enter and record receipts as they are received on the dock.

**Cycle Counts** - perform physical inventory counts and update MAXIMO quickly and accurately.

**Inventory Adjustments** - adjust the inventory quantities when discrepancies are identified.

**Item Updates** - update the item location and reorder points.

**Item Inquiry** - quick viewing of item balances, equipment where used and transaction history.

**Batch and Go** – applications are 'connection aware' and will automatically switch between wireless connection when on-line to batch synchronization when off-line or not in range.

**Intelligent Bar Codes** – improves the ease of use and information capture speed and accuracy. The application knows what data is being captured and automatically positions to the appropriate field for input. PopWare also provides the ability to print barcode bin labels and receipt labels during receiving.

The Inventory Management application is part of PopWare's Mobile group of products that have been developed for MAXIMO. PopWare offers a full turnkey solution, which includes application software, hardware, implementation and training.
