- **Reduce maintenance costs**
- **Increased data accuracy**
- **Simplify business processes**

For all your mobile strategic asset management needs, PopWare's Mobile Work Management provides a mobile solution integrated with your MAXIMO application. Mobile Work Management for MAXIMO delivers out of the box functionality with a set of robust applications operating on a wide variety of standard handheld devices.

The application provides unparalleled ease of use, with a familiar Windows based graphical user interface. Your casual and power users can quickly increase their productivity by enabling and enhancing their work management capabilities.

With PopWare's Mobile Work Management, your users can easily access critical information and perform transactions with improved speed and accuracy.

The first screenshot shows a 'Work Management' screen for 'Roland Smith' on 9/9/2004. It features a table of tasks:

WO-Task	Description	Start
1007-80	OPERATE	
1007-90	REPLACE COPPER	
1008-10	Disconnect power	
1008-20	Repair damaged	
1009-10	Inspect on/off and	
1009-20	Clean motor.	
1009-30	Inspect gear	
1009-40	Inspect, clean, and	
1009-50	Check conveyor	

The second screenshot shows a 'Work Management' screen for a specific task with fields for WO/Task (1000), Labor Code (Roland Smith), Craft Code (Electrician 2nd class), Work Type, GL Account, Hours, and Date (9/9/2004). It includes 'Save', 'Clear', and 'Return' buttons.

The third screenshot shows a 'Work Order' screen for 'Meters for 11300' with fields for Meter 1 Label, Units, Reading Delta, New Reading, New Reading Date (9/9/2004), and a 'Meter Rollover' checkbox. It includes a 'Save' button and navigation arrows.

The **Work Order** application enables each individual user to view their scheduled jobs, close work tasks as they are completed and create new work orders.

Inspection Routing allows users to set up activity lists, check lists and routes. Users can easily perform inspections, verify activities that have been completed and record readings.

Time Card Management allows you to capture employee time immediately after a work order is completed.

Statistics Entry provides the ability to record operational statistics for your critical equipment.

The Work Management application is part of PopWare's Mobile group of products that have been developed for MAXIMO users. Popware offers a full turnkey solution, which includes application software, hardware, implementation and training.
